SUMMARY

React Developer specializing in creating highly responsive user interfaces from design mockups using Figma and Adobe XD. Proficient in localizations and skilled in implementing real-time communication with web sockets. Experienced in agile development, consistently delivering websites that exceed client expectations. Strong expertise in JavaScript and React for building dynamic web experiences, along with valuable experience in Node.js and MQTT for real-time communication and IoT integration. A versatile Front End Developer ready to tackle diverse projects.

EXPERIENCE

Front End Developer vHubs

10/2024 –Present | Cairo, Egypt

Many e-commerce logistics companies face challenges in operational efficiency, customer experience, and scalability. vHubs aims to address these issues by offering innovative, plug-and-play white label solutions for all logistics needs, including first-mile, middle-mile, and last-mile operations. The company's success hinges on its commitment to flexibility, speed, reliability, consistency, and efficiency in logistics services.

- Contributing to the development and implementation of innovative, white-label logistics solutions for e-commerce companies.
- Working on enhancing operational efficiency across First-mile, Middle-mile, and Lastmile logistics operations.
- Focusing on delivering flexible, speedy, reliable, consistent, and efficient logistics services.
- Developing and managing ERP systems to optimize internal processes and improve data management and workflow integration.
